INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/CH2004/000435

Box No. V **Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

1. Statement

Novelty (N)	Claims <u>1-16</u>	YES
	Claims _____	NO
Inventive step (IS)	Claims <u>1-16</u>	YES
	Claims _____	NO
Industrial applicability (IA)	Claims <u>1-16</u>	YES
	Claims _____	NO

2. Citations and explanations (Rule 70.7)

- 1) Document DE 2121586 is regarded as the closest prior art in relation to the subject matter of claims 1-16.
- 2) The installation claimed in claim 1 of the present application differs from the prior art in that the supply conduit and the evacuation conduit (or conduits) for displacing air both extend through a central opening in at least one tier plate. This design principle allows for an increase in performance or structural simplifications whilst having the same power output (see page 2, §2 of the description).
- 3) The problem to be solved by the present invention can be considered that of providing a device for malting cereals, which is more powerful than known installations and/or has a simpler design, more particularly a lighter support structure for the carrier plates, whilst having the same power output.

Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
<p>4) The solution to this problem as proposed in claim 1 of the present application involves an inventive step (PCT Article 33(3)) for the following reasons:</p> <p>D1 and D2 do not make any reference to an increase in performance of malting devices and fail to disclose a central duct for supplying and evacuating air. Thus said design principle does not represent an obvious technical solution from the point of view of a person skilled in the art.</p> <p>5) Claims 2-16 are dependent on claim 1 and therefore likewise meet the PCT requirements regarding novelty and inventive step.</p>
